FireSpy

Our Esteemed Customers

Corporate Office Challenges before FiresSPY

- **Fire risks** in electrical and server rooms

- Traditional **smoke detectors** react after smoke reaches the ceiling

- Security staff gets fatigued watching multiple cameras in the security system

- No automatic camera pop-up → slower reaction time.

- **False alarms** disrupt office operations

How FireSpy Helps Corporate Offices

CLUB HOUSE

⚠ ALERT! FIRE DETECTED   ● REC
CLUB HOUSE

FireSpy

Traditional smoke detectors:	AI-based CCTV fire detection:
• Trigger after smoke spreads	• Early Detection Advantage
• Crucial time to respond lost	• Detects fire with visual at the ignition stage
• Often fail in high-ceiling areas	• Works in large open areas
• Unnecessary panic due to false alerts	• No panic due to false alerts

Corporate Office Challenges before VisionSAFE

- Space utilisation not **optimised**

- **Overcrowding** in common areas during peak hours.

- Poor emergency **evacuation** tracking

- Security staff must watch multiple screens — high chance of **missing incidents.**

- No live update on meeting room availability.

- Security teams monitoring multiple screens may miss critical incidents.

VisionSAFE

How Crowd Management Helps the Corporate Offices

1. **Workforce Optimization**

- Identify **idle areas Optimise**
- shift planning

2. **VisitorTracking(Clients/Vendors / Auditors)**

- Track **entry/exit** time
- Control **restricted area** access
- Provide **security** logs

3. **Emergency Evacuation Monitoring**

- You can **track people** movement
- See **evacuation** progress
- Identify **blocked** exits

VisionSAFE
